

PERSONAL SUMMARY

I'm a recent IT graduate with a strong interest in software development, networking, and cybersecurity. I have experience working with various programming languages and enjoy learning how to build applications, manage databases, and troubleshoot technical issues.

Through my academic projects and internships, I've gained foundational knowledge in networking, IT infrastructure, and systems security. I'm always looking to improve my skills and expand my knowledge, particularly in cloud computing and cybersecurity.

I enjoy problem-solving and taking on challenges that allow me to grow. As I begin my career in IT, I'm focused on gaining more hands on experience and building a strong skill set to contribute to meaningful projects.
